Document Information

About This Manual

This manual covers how NIB staff use the **Admin Portal** to review and process the applications citizens submit through the online portal.

Portal address: <https://nibonline-admin.nib-bahamas.com>

Who should read this:

- Customer Service Officers (**NON SUPERVISOR CS**)
- Family Island Unit non-supervisor staff (**NON SUPERVISOR FIU**)
- IT support staff (**NON SUPERVISOR IT** , **SUPERVISOR IT** , **SECURITY MANAGER IT**)
- OHSU non-supervisor staff (**NON SUPERVISOR OHSU**)
- Anyone who needs to route applications, review documents, and request re-uploads

If you can approve or deny applications, you have a supervisor-tier role. Please read the **Supervisor Manual** instead, which covers the additional approve / deny / reassignment workflows.

What you'll learn:

- How to sign in with your LDAP credentials
- How to navigate the application queue
- How to open and review an application's details
- How to download supporting documents
- How to **route an application to yourself** so you can work on it
- How to **request a document re-upload** when something is missing or unreadable
- How to read the activity log for any application

What this manual does NOT cover (those are in the Supervisor Manual):

- Approving applications
- Denying applications (with denial reasons)
- Re-assigning applications to other officers
- Changing the local office handling an application
- Generating official PDF forms (B80, B81, etc.)
- Office-wide / department-wide statistics

If you have questions this manual doesn't cover, ask your supervisor or contact NIB IT.

1. Signing In

Open nibonline-admin.nib-bahamas.com in your browser. You'll land on the admin login screen.

The screenshot shows the login interface for the Administrative Portal. At the top, there is a logo for The National Insurance Board (NIB) of The Commonwealth of The Bahamas. Below the logo, the text "THE NATIONAL INSURANCE BOARD of The Commonwealth of The Bahamas" is displayed. The main heading is "Administrative Portal - Login". There are two input fields: "Username" and "Password". Below the "Password" field is a blue "Sign In" button.

What you need:

- Your **LDAP username** (the same one you use for other NIB internal systems)
- Your **LDAP password**

The admin portal authenticates against the corporate LDAP directory. After your password is verified, the system looks up your **roles** from the Oracle `dbo.security_role_user` table to determine what you're allowed to do.

If your LDAP password works but you receive a "no permission" toast on the page, that means your account doesn't yet have an admin role assigned. Ask your department head to request the appropriate role from NIB IT.

If your LDAP password doesn't work, contact NIB IT — the admin portal does NOT have a self-service password reset.

2. The Applications Hub

After signing in, you land on the **Applications hub** — a chooser for the two application domains you can work in.

Two large cards represent the two domains:

- **Online Card Renewals** — Search and manage online card renewal applications.
- **Claims** — Search and manage online claim applications.

Click whichever card matches the work you need to do. The top nav has **Dashboard** and **Applications** tabs; you can also click your name in the top right to sign out.

Your hub may show the Cards card, the Claims card, both, or neither depending on which roles you have. For example, OHSU staff only see Claims (they handle Injury Benefit claims). Cards Registration staff only see Cards.

3. Finding an Application

3.1 The Claim Applications queue

If your role gives you access to Claims, click **Claims** from the hub. You'll see the queue.

12	90000422	John	Doe	Sickness	Pending	National Insurance Headquarters	October 24, 2025

Page: 1

The queue shows applications matching your filter. The header shows the result count (e.g., **“Results found: 71”**) and the table lists:

Column	Meaning
Application ID	Internal unique number for the application
NI Number	The citizen's NIB number
First Name / Last Name	The citizen who submitted the application
Application Type	The benefit type (Sickness, Unemployment, Maternity, etc.)
Status	Where the application is in the workflow
Local Office	Which NIB office is handling it
Inserted Date	When the citizen submitted it

Click any row to open that application's detail page.

3.2 The Card Applications queue

If your role gives you access to Cards, click [Online Card Renewals](#) from the hub.

Page: 1

Same filter form, different result columns. Application Type values will be **New**, **Renewal**, or **Replacement**.

3.3 Using filters

Both queues share the same filter form at the top:

Filter	What it does
Application ID	Find one specific application by its internal number
NI Number	Find all applications from one citizen
First Name / Last Name	Search by claimant name
Application Type	Limit to one benefit / card type
Status	Submitted, In Review, Pending, Approved, Denied, Reupload Requested
Routed To	Filter by which officer owns it (see §4.3 about routing)
Local Office	Filter to one office (your access may be limited to your own office)
From / To Inserted Date	Date range when the citizen submitted

Click **Search** to apply your filters, or **Clear** to reset.

3.4 What you see depends on your role

By default:

- **NON SUPERVISOR CS** and **NON SUPERVISOR FIU**: see only applications routed to *your* local office
- **IT** roles: see all applications (read-only view)
- **OHSU** non-supervisor: see Injury Benefit claims

If you expect to see an application but don't, check the filters first. If filters are clear and you still don't see it, your role may not include that office's scope — ask your supervisor.

4. Reviewing an Application

Click any row in the queue to open the application detail page.

The detail page is organized into sections:

1. **Header** — claim type and claim number (e.g., "Unemployment Claim #1") with a status badge (e.g., "Pending")
2. **Routed To** — which officer currently owns this application (or empty if not yet routed)
3. **Claimant Details** — the citizen's name, NI number, email
4. **Claim-specific Details** — fields specific to this benefit type (for Unemployment: last working date, employer info, pension status, severance days, vacation days, etc.)
5. **Application Documents** — uploaded files (passport, B80, etc.) with **Download**, **Upload History**, and additional document-action links (see §4.5)
6. **Contact Information** — phone numbers and primary contact flag
7. **Application address Information** — the citizen's mailing/physical address
8. **Activity Log** — audit trail (scroll to the bottom)

Address Information

Information about the applicant's address.

Country	City	State	Description
BAHAMAS	ALBERT TOWN	LONG CAY	TEST LANE STREET
Type	Found in V3	Start Date	Stop Date
Residential	false	January 16, 2026	

A card detail page has a similar structure with cards-specific sections:

- **Person Information** — full name, NI Number, **Registrant Type** (Bahamian / Non-Bahamian), gender, DOB, country of nationality, marital status
- **Application Information** — application type (New / Renewal / Replacement), reason for name change (if applicable), Ready for Pickup flag, Local Office
- **Non-Bahamian Details** — *(only for non-Bahamian registrants)* permanent-resident flag, resident card number + expiry, work permit number + expiry
- **Application Documents** — R4, Passport, Work Permit, etc.
- **Contact Information** and **Address Information**

4.3 Routing — claiming an application to work on

Most actions in the portal require an officer to be the **Routed To** owner of the application. When you find a new application in the unrouted pool, claim it by clicking **Route To Me**.

After you click Route To Me:

- The Routed To field now shows your name
- You're notified by the system if other officers try to act on the application
- You can take any further actions allowed by your role

If an application is already routed to someone else, you can still:

- Review its documents and details
- Read the activity log

But to take action, you need to either:

- Ask the current routed-to officer to hand it off (they can re-assign if their role allows — see Supervisor Manual)
- Or escalate to a supervisor who can re-assign on your behalf

4.4 Downloading documents

Each uploaded document in the **Application Documents** section has a **Download** link. Click it to retrieve the file (PDF, JPG, PNG) to your computer.

The download is served directly from the file storage shared between the citizen portal and the admin portal — the file you download is the same file the citizen uploaded. There's no copy / transfer delay.

If a document fails to download with the error “**400: File does not exist**”, do NOT ask the citizen to re-upload. Take a screenshot of the error and notify NIB IT — there may be a database / file-path issue that needs engineering attention. Asking the citizen to re-upload often masks the underlying problem.

4.5 Requesting a document re-upload

If a document is unreadable, blurry, incomplete, expired, or the wrong document type, you can ask the citizen to upload a replacement.

Click **Request Reuploads** in the Application Documents header. You’ll be prompted to:

1. **Select which document(s)** need a new upload
2. **Choose a reason** for each — typical reasons include:
 - Unreadable / blurry
 - Wrong document type
 - Document is incomplete
 - Document is expired
 - Other (with free-text note)
3. **Confirm** the request

After you confirm:

- The document’s status changes to **REUPLOAD_REQUESTED**
- The citizen receives an automatic email letting them know
- The citizen sees a banner / prompt on their portal home and “My Claims” / “Card Applications” list the next time they sign in
- The application’s overall status reflects that it’s waiting on the citizen

When the citizen uploads a replacement, the document status returns to **SUBMITTED**, and you’ll see the new file when you next open the application. You can then continue your review.

5. The Activity Log

Every significant action taken on an application is logged with a timestamp and the officer’s identity. Scroll to the bottom of the application detail page to find the **Activity Log**.

The log records:

- Routing changes (who routed it, when, who claimed it)
- Re-upload requests (which document, the reason, who requested)
- Document downloads
- Status changes (Submitted → In Review → etc.)
- Approval / denial (when applicable)
- Local-office changes

You can filter the log by date range or activity type if it's long.

The activity log is a **regulatory audit trail** — it's not just a UI feature. It's stored permanently in Oracle and used for NIB compliance reporting. Do not attempt to bypass it; every action you take should be visible in the log so others can follow what happened.

6. Common Tasks

Find a specific citizen's application

Use **NI Number** in the queue filter. This is faster than scrolling. If you don't know the NI number, search by **Last Name + First Name**.

Find work you're currently handling

Filter by **Routed To** = your name (your username should appear in the dropdown). This shows your active workload.

Check what's been recently submitted

Set **From Inserted Date** = today (or yesterday). Leave the **To** date blank. Sort by Inserted Date if needed.

Read the audit history before acting

Always check the **Activity Log** at the bottom of the detail page before requesting a re-upload or asking for guidance. The log may show that another officer already requested a re-upload, or that the citizen has already responded to a prior request.

7. Common Issues

Issue	What to do
I can't sign in — LDAP rejected my password	Contact NIB IT to reset your LDAP password. The admin portal has no self-service reset.
I signed in but see a "no permission" toast	Your LDAP account doesn't have an admin role. Ask your supervisor to request the role from NIB IT.
I can see the application but can't approve / deny	Approve / deny is reserved for supervisor-tier roles. Either escalate to your supervisor, or check the Supervisor Manual to confirm whether your role should have access.
An expected application isn't showing in the queue	Clear all filters and re-search. If still missing, the application may be assigned to a different local office (you only see your office by default). Ask your supervisor to widen the search or check Routed-To.
A document download returns "400: File does not exist"	Don't ask the citizen to re-upload. Screenshot and report to NIB IT.
The Routed-To search field doesn't return results	Known issue at time of writing (admin SPA <code>useRoutedToSearch</code>). Use NI Number or claimant name search instead.
Filter shortcuts on the queue aren't applying	Known issue at time of writing. Use the dropdown filters manually.

8. Need Help?

- **LDAP / sign-in issues:** Contact NIB IT helpdesk.
- **Role assignment requests** (e.g., "I should be able to approve but the button isn't showing"): submit through your department head, who can have NIB IT update the `dbo.security_role_user` table.
- **A bug in the admin portal:** Report to the engineering team. Include the application ID, your username, and a screenshot if possible.
- **A specific application's data looks wrong** (e.g., "Why isn't the banking doc showing?"): the engineering team can run database queries to investigate.

Document Information

Title: NIB Online Portal — Admin Manual **Audience:** Customer Service Officers and Non-Supervisor Admin Staff **Version:** 1.0 **Issued:** 2026-05-20 **Published by:** National Insurance Board of The Bahamas

This manual covers the workflows available to non-supervisor admin staff. For approve / deny / reassignment / form generation / statistics, please refer to the [Supervisor Manual](#).

Screenshots reflect the portal as of the issue date. If you notice a significant difference between this manual and what you see on screen, please notify NIB IT.
